## **ERROR REPORT**

THERE WERE NO ERRORS DURING THE TEST

## **GLOSSARY**

#### Virtual User

The entity used by load generation tool to simulate real users accessing the system under test.

## Throughput

Number of requests completed in a time interval.

## **Response Time**

The time that passed to perform the request and receive full response.

## **Bandwidth Usage**

Amount of the network traffic that goes through network infrastructure.

## **ABOUT BLAZEMETER**

BlazeMeter offers a cross-enterprise test automation framework for the entire technical team throughout the product development lifecycle. Developers, DevOps, Ops and QA Engineers can run Continuous or "On Demand" testing for APIs, mobile apps and websites.

BlazeMeter can be used in the cloud, on-premise or as a hybrid solution. It is compatible with Apache JMeter and Selenium and integrates with CI, CD, and APM tools.

More than 100,000 users rely on BlazeMeter for their testing needs.
